

New Indoor Golf Studio Comes to Deerpath Golf Course

November 1, 2011- March 15, 2012

Richard Franklin, Director of Instruction at Deerpath Golf Course, is bringing his teaching indoors! Starting November 1, the restaurant area at the golf course will be converted into a state of the art indoor golf facility; offering an ideal setting to golfers of all abilities looking to improve their games during the winter months. The indoor studio will include a FlightScope 3D Doplar Tracking radar, a high speed camera, V1 software, Swing Catalyst software and much more. This Winter at Deerpath Golf Course be a part of "game changing" technology and instruction.

For more information on the Flightscope technology visit www.circlesystemsgolf.com or www.flightscope.com

For more information, to book lessons or reserve a spot in one of the Winter programs: Call Richard Franklin at (847)219-0200 or SIGN UP at www.circlesystemsgolf.com

PRIVATE GOLF LESSONS:

Whether you want to make a fundamentally sound start to your golfing career or you want to finally take your game to the next level, Richard Franklin and his Winter 2012 instruction program offers the solution. With the Flightscope technology golfers will finally understand why good shots happen. All variables related to the golf ball (*ball speed, both vertical and horizontal launch angles, sidespin, backspin*) and all variables as they relate to club head (*club head speed, club vertical attack angle, club horizontal attack angle, club face angle*) will be measured in real time on every shot! Going one step further each lesson will include the use of Swing Catalyst software; allowing the student's slow motion video to be integrated with the shot's numerical values. *Additional features include: take home analysis of all flightscope "screens" to all students with an iphone, ipad, or android device.*

Hourly Rates:

- 1 Hour: \$95
- 5 Hours of Private Instruction at \$415
- 10 Hours of Private Instruction at \$745

JUNIOR GOLF INSTRUCTION:

Junior instruction will use all of the available technologies with a special emphasis on using some of Flightscope's premier software services. Juniors will hone their games by working on "skills challenge": a feature that challenges the golfer to carry each shot a certain distance. Also, Juniors will take advantage of the "golf course simulator"; allowing them to measure their improvement on the virtual course!

AFTER SCHOOL PROGRAM

(limited availability):

10 (1) hour lessons by appointment on weekday afternoons. Each participant will be emailed Flightscope generated information charting improvements in shot dispersion and total distance. Students will also receive "bag tags" showing the typical distance that each club in their bag travels. This program offers an innovative and FUN way to learn how to play better golf!

Rate: \$595
